PROFESSIONAL EXPERIENCE

AUG 2017 — **Software Engineer at Ada Health**

Architected and built several microservices in Node.js (React server render, ad system, auth, GraphQL server), took care of containerization and deployment.

Developed service to integrate ada platform on client websites.

Created React UI library that works in React and React Native.

Responsible for the views in porting the main mobile app to its web version.

Championed the introduction of several technologies (GraphQL, statecharts, golang).

Created dynamic multilanguage website (react, nextjs and contentful).

Mentored 3 colleagues.

Gave several talks to coworkers (event loop, error handling in express, xstate vs redux, debugging).

AUG 2017
FEB 2015 — **Front End Developer at Resmio**

Arrived at a Backbone codebase evolved organically with no UX/UI designer.

Refactored into independent modules, code was reduced in 40% and performance improved by 30%.

Developed a style guide working closely with the designer.

JAN 2015
NOV 2014 — **Front End Developer at Jobspotting**

NOV 2013
OCT 2009 — **Founder & Art Director at Malgusto**

NOV2013
JAN 2003 — **Freelance Graphic & Web Designer**

DEC 2002
OCT 1996 — **Graphic Designer at Normaprint**

ME, MYSELF AND I

I enjoy the keyboard, but you'll have to first convince me at the whiteboard.

I realized sometimes you need to be a wizard, and sometimes an engineer.

I can listen to an UX or a Sysadmin and understand what both are saying.

I love learning (and teaching).

Early bird, some experience working remotely.

BUZZWORDS

Javascript, CSS, DOM, Node.js, React, React Native, Redux, GraphQL, Git, Backbone, Docker (and compose), Kubernetes, CI/CD, Webpack, Gulp, Sass, Golang, (some) Elixir.

HUMAN LANGUAGES

Native:
Spanish
Professional Proficiency:
English
Catalan
Kebab Ordering Proficiency:
German

EDUCATION

APR 2014
OCT 2013 — **Dev Bootcamp San Francisco**

Dev Bootcamp was an intensive training program.

They showed me all the stuff I needed to learn and how to learn it (SQL, Big O, Algorithms, RESTful ...).

Also how to work best with other humans (developer empathy, pairing, ...).
